### Stainless Steel Surface Finish Type

| Finish                     | Thickness        | Characteristics   |
|----------------------------|------------------|---|
| No. 1                      | 2.0mm<br>~12.0mm | Surface finished by hot-rolling, annealing and pickling, characterized by white pickled surface.    |
| 2B                         | 0.3mm ~3.0mm     | Finished by heat treatment, pickling after cold rolling, followed by skin pass line to be brighter. |
| BA<br>(Bright<br>Annealed) | 0.3mm ~1.5mm     | Processed with bright heat treatment after cold rolling.  |
| No. 4                      | 0.4mm ~3.0mm     | Polishing with No. 150 to No.180 abrasives. The most popular finishes.                              |
| HL<br>(Hair Line)          | 0.4mm ~3.0mm     | Finished by continuous polishing streaks by using abrasive of suitable grain size.                  |
| SB<br>(Scotch-Brite)       |                  |   |
